

SCT-100-AD-Panasonic

AD Manchester to Panasonic RS-485 Code Translator

The code translator converts American Dynamics manchester camera control code into Panasonic RS-485 code for a single P/T/Z. Only camera control code for the address matching the Address Selector switches is converted.

Panasonic output code is selectable from 2400 baud to 19.2K baud. The output can be sent with or without an address

A test mode sends a continuous square movement pattern to the P/T/Z so the wiring and addressing between the translator and the P/T/Z can be checked without an AD controller. The input receiver is disabled during test mode.

Address Selector
Selects the camera address. The valid address range is 1-64

Rx Indicator
Flashes when there is data on the input lines.

Error Indicator
Flashes on input error.

Status Indicator
Lights if an invalid address is selected.

Tx Indicator
Flashes when Panasonic output code is sent.

Configuration Switches

Switches 1&2: Panasonic Baud

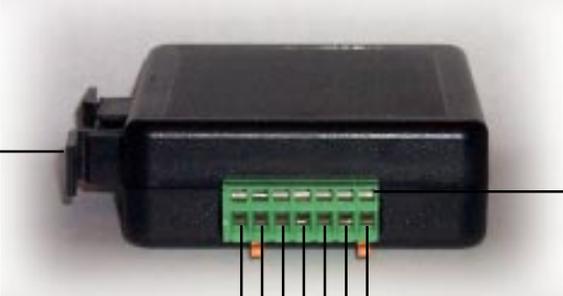

1 Down	2 Down	2400
1 Up	2 Down	4800
1 Down	2 Up	9600
1 Up	2 Up	19.2K

Switch 3: Unassigned

NOTES

Switch Settings

Any changes in switch settings are effective immediately, they are not read only on power up.

Addressing

Only camera control code for the camera number set by the Address Switches is converted.

If switch 5 is Off, the output code does not contain an address. This can be used for direct wiring to a camera and the camera's address switches are ignored.

If switch 5 is On, the output code has the same address as the AD camera address. The Panasonic camera's address must be set to the same number. This mode can also be used for operation with a WJ-MP204.

Indicators

The **Rx** LED will flash when there is data on the input.

The **Error** LED will flash if the input code is not recognized as valid AD manchester code.

The **Status** LED will light if the address switches are not set to a valid address (1~64).

The **Tx** LED flashes for each Panasonic packet sent.

OPERATION

PTZ

The code translator converts pan, tilt, zoom, focus and iris code directly.

Other commands are converted according to the following table.

	<u>AD Command</u>	<u>Panasonic Command</u>	<u>AD Command</u>	<u>Panasonic Command</u>
Aux:	On 1	Start Autopan	Off 1	Stop Autopan
	On 2	Auto Iris	Off 2	Manual Iris
	On 1	Oneshot Auto Focus		

Presets: AD call preset & program presets from 1~49 are converted to Panasonic preset commands,

Camera Menu:

Pgm preset 50 Menu Off

Pgm preset 51 Menu On

The menu cursor control commands are arrayed by cursor direction on the keyboard.

Pgm preset 52 Cursor Up

Pgm preset 54 Cursor Left

Pgm preset 56 Cursor Right

Pgm preset 58 Cursor Down

Pgm preset 57 & 59 send the Panasonic Menu Set1 & 2 commands to select menu items.

Pgm preset 57 Menu Set 1

Pgm preset 59 Menu Set 2

Pgm preset 71 & 72 send the Panasonic Special Menu Set commands.

Pgm preset 71 Special menu refresh

Pgm preset 72 Special menu cam reset

Patrol: Call preset 65 Patrol Play

Call preset 66 Patrol Stop

Pgm preset 65 Patrol Learn

Pgm preset 66 Patrol Stop

Misc:

Pgm preset 61 Set autopan start point

Pgm preset 62 Set autopan end point

Pgm preset 63 AGC On

Pgm preset 64 AGC Off
