

# SCT-100-Vicon-Panasonic

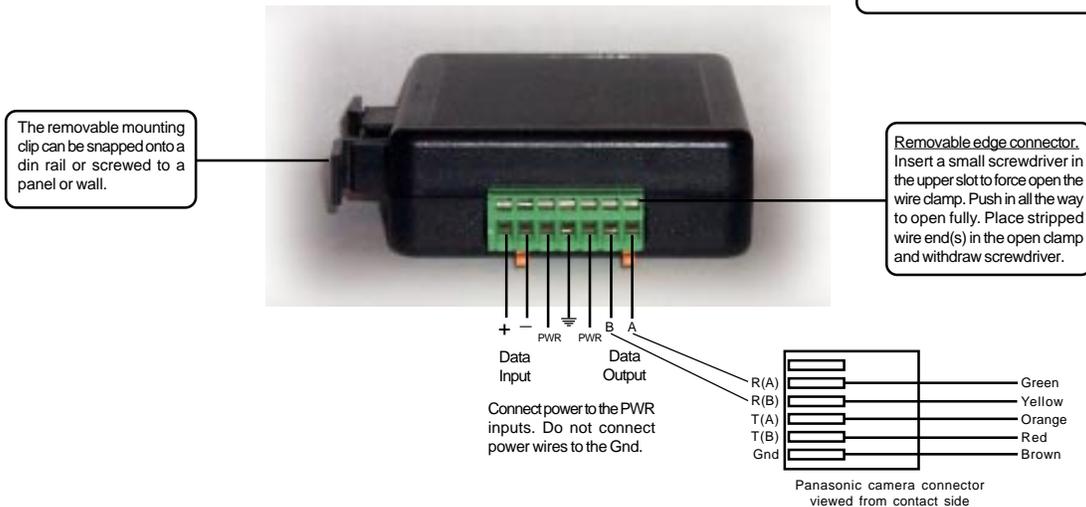

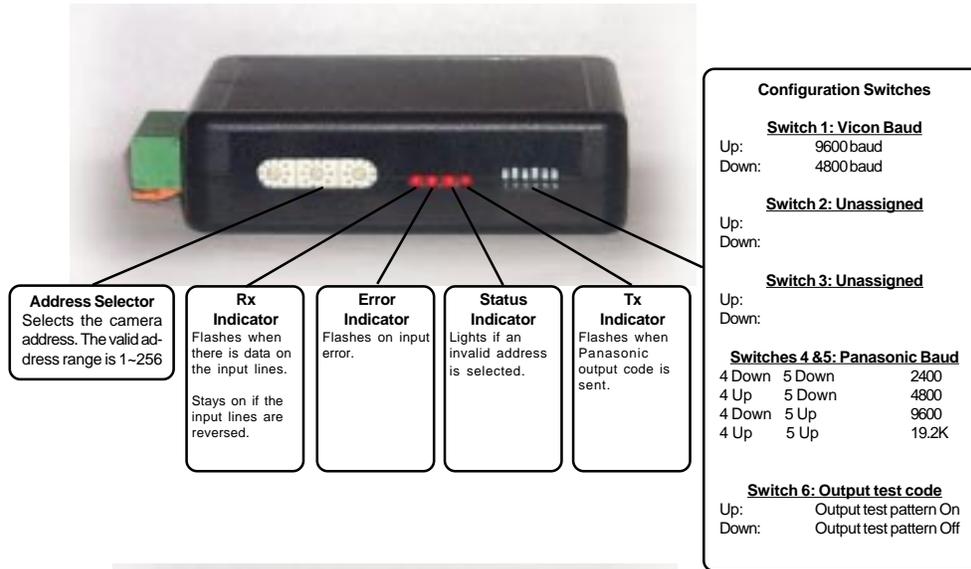

## Vicon RS-422 to Panasonic RS-485 Code Translator

The code translator converts Vicon camera control code to Panasonic code for a single P/T/Z. Only camera control code for the address matching the Address Selector switches is converted.

Input Vicon code can be selected for 4800 baud or 9600 baud

Output code is selectable from 2400 baud to 19.2K baud. The output is Panasonic conventional protocol without a unit address so the camera's address switch does not have to be set.

A test mode sends a continuous square movement pattern to the P/T/Z so the wiring and addressing between the translator and the P/T/Z can be checked without a Vicon controller. The input receiver is disabled during test mode.

**SPECIFICATIONS:**

Size: 4.5" x 3.5" x 1.25"  
 Weight: 0.5 lb  
 Power: 9~15Volt AC or DC at 75ma  
 Environmental: Indoor use only

Sennetech, Inc. 6455 W. Bath Rd. Perry, MI 48872 U.S.A. Tele: (517) 675-1150 Fax: (517) 675-1151

## NOTES

### **Switch Settings**

Any changes in switch settings are effective immediately, they are not read only on power up.

### **Addressing**

Only camera control code for the camera number set by the Address Switches is converted.

### **Indicators**

The **Rx** LED will flash when there is data on the input. If the wires are reversed, it will stay on.

The **Error** LED will flash if the input code is not recognized as valid Vicon code.

The **Status** LED will light if the address switches are not set to a valid address (1~256).

The **Tx** LED flashes for each Panasonic packet sent.

## OPERATION

### **PTZ**

The code translator converts pan, tilt, zoom, focus and iris code directly.

### **Presets**

Vicon presets from 1~64 are converted to Panasonic presets,

### **Autopan**

The Vicon [A/P] key sends Panasonic Autopan On.

Other commands are converted according to the following table.

	<u>Vicon Command</u>	<u>Panasonic Command</u>
	90 Pset	Patrol Play
	90 Pgm Pset	Patrol Learn
	91 Pset/PgmPset	Patrol Stop
	92 Pgm Pset	Set autopan start position
	93 Pgm Pset	Set autopan end position
	Aux 1	Decrease autopan speed
	Aux 2	Increase autopan speed (The speed commands must be sent many times to make a significant speed change.)
<b>SetupMenu</b>	94 Pgm Pset	Activate Camera Setup Menu
	(To navigate the menu use the [Aux] keys	
	[Aux 1]	Cursor Left
	[Aux 2]	Cursor Up
	[Aux 3]	Cursor right
	[Aux 4]	Cursor down
	[A/I]	Select highlighted item
	[L/S]	Return to previous menu
	[Aux 6]	Exit Menu
	(Any pan, tilt, zoom, or focus command will automatically exit the menu.)
